Subject: MBTA CRMF (MA0003590) - Draft permit effluent limitation table & suggested BMPs
Attachments: Effluent_limitation_comp_table_12112017.xlsx; Suggested_BMPs_12152017.docx; MBTA Response to EPA re Section 308.pdf

Flag: Follow up

Hi David,

I hope you had a great weekend.

Attached are two items you requested to get the ball rolling for the MBTA CRMF draft permit:

- 1) The Excel workbook includes a table that compares the draft permit requirements with those in the new permit
- 2) The Word document includes a set of targeted BMPs for the draft permit that deal with drainage system investigations and the commingling of groundwater
 - a. I modified some of these BMPs to be more specific in light of the response from Keolis to the 308 (also attached in the form of a .pdf)

I spoke with Anne about the Boston Sand & Gravel response to comments this morning. Since Anne and I are in the thick of this other permit and don't want to lose focus, right now I would not recommend that all four of us (you, me, George, and Anne) meet and discuss the MBTA CRMF until Anne and I have gotten you a Boston Sand & Gravel draft response to comments. I hope to get you a new draft of the Boston Sand & Gravel response to comments by Thursday (12/21).

However, please let me know what you think would work best for your schedule this week and what would make the most sense for moving either permit forward. George and I are both available Thursday afternoon (12/21) for discussing the MBTA CRMF.
